

Autoneum is globally leading in acoustic and thermal management for vehicles. The Company develops and produces multifunctional, lightweight components and systems for interior floor and engine bay as well as the underbody. Customers include almost all automobile manufacturers in Europe, North & South America, Asia and Africa. Autoneum operates 67 production facilities and employs around 16100 people in 24 countries. The Company with its headquarters in Winterthur, Switzerland, is listed on the SIX Swiss Exchange (ticker symbol AUTN).

Currently we are looking for a:

Product and Process Engineer (m/f/d)

Germany – Bocholt – 100%

Your responsibilities

As a product and process engineer in the Product Line you are responsible for product development activities from the time the order is placed until the end of production. In particular, you will ensure that technical customer requirements are met, that the product can be manufactured and that profitability targets are achieved. Your individual tasks include to

- ensure profitable and successful product development phase
- assess product maturity and feasibility by initiating tests and trials vs. customer requirements and critical characteristics
- supervise the maturation of the feasible part CAD in collaboration with internal/external CAD services
- integrate Autoneum Production System (APS) principles in the product and process design (manufacturing feasibility)
- ensure manufacturing process design requirements are respected and aligned with the plants
- create and update product and process data in PLM on time according to APD (bill of materials, purchased part specifications, critical process parameters, drawings, DFMEA)
- track profitability by updating part cost calculations and take necessary actions for mitigating deviations
- align with validation laboratories / AQP for product validation (PPAP)
- supervise relevant prototyping activities related to awarded projects

Your qualifications

- Bachelor/Master of Science in Engineering or equivalent qualification
- experience with product development (preferably in the automotive business)
- target-oriented attitude
- quick learner with good time management skills
- independent, highly organized and able to cope with variable workloads
- willing to travel and to work in an international and multicultural environment

We offer:

- varied and responsible activities in a dynamic environment with international contacts
- 30 days vacation and a 37-hour week (for full-time employees)
- remote working and flexible working hours
- external and internal training opportunities
- a collegial working environment in a team that looks forward to meeting you
- collective benefits such as christmas and vacation bonuses

We look forward to receiving your application (PDF format), the earliest possible starting date and your salary expectations. If you have any questions, please do not hesitate to contact Katharina Henseler.
